

Coastal Point letter to the editor, 10/22/10

McCabe is there for the middle class

Editor:

Our beautiful Sussex County is always being developed, and almost all of the old way of life we had here is gone. But what we have left and the culture we have is precious, representing America in a way that few other places do.

We are farmers, laborers, watermen, firefighters, workers, bankers. We work for the government or we work for ourselves.

We are middle-America. And I trust only one person who can understand that, protect it and make sure we have good job growth and development that protects our farms and bays, our history and our culture.

That man is Russ McCabe, and in November, I hope everyone who reads this votes for him for representative, because he is one of us and will represent us. Russ is going to go to Dover and make history, because he will advocate for Sussex County at a time we need it.
